

WOMADelaide 2010

Dust Minimisation plans

- Engaging a professional environmental consultant to construct a Dust Management Plan and also monitor dust levels over the event weekend.
- A professional water cartage company employed to water the park
- Heavy duty vehicle mats to be used around high traffic areas
- Upgraded traffic management plan
- Pedestrian track laid out between stage 1 and 2 to reduce the dirt scuffing during the event.
- Use of hand watering (within restrictions) on the high foot traffic areas prior to and during the event weekend.
- Developed relationship with the Asthma Foundation of SA for assistance with pre event information provided to the public.
- St John's and a site pharmacy provided during the event weekend to assist with any health related issues.
- Liaising with Botanic Gardens regarding a sufficient water management schedule pre event.
